

**A REVIEW OF SCIENCE RELEVANT TO COVID-19 SOCIAL POLICIES**  
**(medical proofs of children genocide)**

1. Face masks/covering restrict recirculation the virus into the nasal/sinus and upper respiratory passages and can infect the brain. By wearing masks you turn on self contamination mechanism of your body that ordinary contains thousands viruses under our immunity system control. Permanent wearing masks can increase the chance of many infections (Dr. Daniel W. Erickson, DO, USA). At this point the cloth masks are the most harmful. There is also a danger of reducing oxygen (O<sub>2</sub>) and increasing Carbon Dioxide (CO<sub>2</sub>) to unsafe levels [4][5][6].
2. Some forces want to damage our kids by making wearing masks compulsory in schools despite the fact the kids do not catch this virus [1][2][3]. What are the true reasons of compulsory wearing masks in schools? Just think that masks 1. Reduce oxygen [4][38] 2. Increase carbon dioxide to unsafe levels [5] 3. Turn on self contamination body process [17]. All of that lead to reduce: a) Brain and immunity function [18] b) Healthy and smart children population [32][33] c) Development of children's will and individuality [4][5][paragraphs: 29-34]. Unsafe levels of oxygen and CO<sub>2</sub> occur in first minutes of mask wearing.
3. The Hypercapnia is the elevation of carbon dioxide (CO<sub>2</sub>) in blood and tissues, commonly occurs in severe acute and chronic respiratory diseases, and is associated with increased risk of mortality. Recent studies have shown that hypercapnia adversely affects innate immunity, host defense, lung edema clearance and cell proliferation. Airway epithelial dysfunction is a feature of advanced lung disease. These changes in gene expression indicate the potential for hypercapnia to impact bronchial epithelial cell function in ways that may contribute to poor clinical outcomes in patients with severe acute or advanced chronic lung diseases. This clearly can have a negative impact with a disease like COVID-19 [6].
4. Basic reason that masks might make you stupid: decreasing oxygen flow to the brain. Face veils reduce ventilatory function in the long-term (Alghadir, Aly & Zafar, 2012), and surgical masks may reduce blood oxygenation among surgeons (Beder et al., 2008): believe it or not, covering your mouth makes it harder to breathe. Reviewing the N95 face mask, a 2010 study (Roberge et al.) concluded that “carbon dioxide and oxygen levels were significantly above and below, respectively, the ambient workplace standards” inside the mask. A post-COVID study found that 81% of 128 previously-fit healthcare workers developed headaches as a result of wearing personal protective equipment (Ong et al., 2020). Repeated episodes of low oxygen - known as intermittent hypoxia - also “causes atherosclerosis” and hence increases “all cardiovascular events” such as heart attacks – as well as adverse cerebral events like stroke. Blaylock, quoting Savransky V et al [38].
5. The increased rate of infection in mask-wearers may be due to a weakening of immune function during mask use. Surgeons have been found to have lower oxygen saturation after surgeries even as short as 30 minutes [28]. Low oxygen induces hypoxia-inducible factor 1 alpha (HIF-1) [29]. This in turn down-regulates CD4+ T-cells. CD4+ T-cells, in turn, are necessary for viral immunity [30]. The most registered covid19 symptomatic cases are people 70.6% who permanently worn masks according CDC [35]. The same report says that only 3.9% of symptomatic cases are people who have never worn masks. So people who do not wear masks are wise enough and stay safer.
6. Masks increase transmission of infections. This fact is known. Any mask itself starts to exposure germs in short period of time. It should be changed often and worn properly. It is not about kids. And of course no washing, no cloth material, no a laundry [24]. The cloth masks are less effective than surgeons at this point [25]. This 2016 meta-analysis found that both randomized controlled trials and observational studies of N95 respirators and surgical masks used by healthcare workers did not show benefit against transmission of acute respiratory infections [23]. The class of masked students is dangerous source of contaminants. Exposing all kinds of germs through masks in schools will be significantly increased rather than decreased. We are not foes for our children to allow them to present in such bacteriological environment.
7. People are mainly buying face masks due to a lack of accurate knowledge about the transmission of the covid19. The hysteria is also clearly pushing demand as the public is met with an onslaught of pictures in the media of people wearing masks. Sadly, some sellers are also inevitably taking advantage of the situation and are making a profit out of the widespread paranoia by selling masks online. The chance of catching Covid-19 from a passing interaction in a public space is therefore minimal. In many cases, the desire for widespread masking is a reflexive reaction to anxiety over the false pandemic [26].
8. On April 21, 2020, the American Medical Association released a position paper on masks. “Face masks should be used only by individuals who have symptoms of respiratory infection such as coughing, sneezing, or, in some cases, fever. Face masks should not be worn by healthy individuals to protect themselves from acquiring respiratory infection because there is no evidence to suggest that face masks worn by healthy individuals are effective in preventing people from becoming ill [27]. “The one time you would want a mask is if you’re sick and you have to leave the house,” Dr.

Perencevich MD, a professor of medicine and epidemiology at the University of Iowa's College of Medicine told Forbes as well.

9. The CDC study found limited evidence on the effectiveness of face covering, improved hygiene and environmental cleaning [40]. That is why the CDC has never said about mandatory face covering and released just recommendation described in their guidelines. There is question why some governors and many businesses, schools, colleagues force people to wear masks permanently and make requirements actually go against CDC and constitutional liberties?
10. Masks and any face covering reduce oxygen level. Despite the mainstream media lie the link between the mental health and oxygen is clear [15], [16]. The news coming in of stories about passing out and deaths caused of face covering and masks [36], [37].
11. Probably the greatest hoax related with covid19 we can proof by comparing general death rate regardless of reason by country. If a pandemic is real in 2020 the all cause mortality rate has to be far more then for example in 2017. In 2017 the USA had 8.2 per 1000 population but in the 2020 it is 8.3 per 1000. The same things for Italy, Germany and any other countries [41], [42]. Where is contribution to the death by terrible pandemic? So the "pandemic" is a total hoax in fact is made by pharmaceutical lobbyists in government and mainstream media. The same thing is confirmed also by Dr. Denis Rancourt [43].
12. Numerous studies have now shown that children hardly get Covid19 and do not or hardly transmit the virus, which was already known from the 2003 SARS outbreak. There was therefore no medical reason for the closure of schools at any time [8]. For children, COVID-19 is less dangerous than many other germs [2].
13. Children under 10 are less likely to get infected than adults and if they get infected, they are less likely to get seriously ill. What is interesting is that even if children do get infected, they are less likely to transmit the disease to others than adults. A single instance of a child infecting parents was not found [9]. Also it is impossible to reach critical concentration of viruses in aerosol parcels that is why wearing masks outside is nothing than harm for person who is in. Closing playgrounds, beaches etc. also nothing than insanity. At this point it is unbelievable that official politicians and law makers ignore this and others scientific facts and continue lead this country down the path of destruction into an abyss by pretending they fight against virus but in fact spread more fears to get control. "By making mask-wearing recommendations and policies for the general public, or by expressly condoning the practice, governments have both deliberately ignored the scientific evidence and done the opposite of following the precautionary principle (Dr. Joel Hay, PhD).
14. The Public Health Agency of Sweden does not currently recommend a broad use of face covering in society as knowledge of how masks affect the spread of infections is uncertain [7]. Make sense to remember that Sweden is one of the countries has not ever had any covid19 strict policies. People are free to go to any facilities without masks. The Sweden shows the better reducing of cases of covid19 in compare to covid19 tyranny in other countries. Schools have never been closed and students attend them without masks. So America as the country with freedom declaration has something to learn from such guys like Swedes.
15. Asymptomatic is not the same as symptomatic because no evidences of asymptomatic transmission especially for kids. It cannot be equal cause having symptoms and be healthy are different things. Asymptomatic people are completely healthy people at this point. Asymptomatic means strong immunity system that does not allow a body to be sick. This people are basement of herd immunity not threat. That is why there are also no medical reasons for masks or 'social distancing' rules for children any age without symptoms. The major way of transmission is symptomatic through coughing and sneezing. The statement that asymptomatic transmission is dangerous is total lie [11], [12], [13]. The WHO declared in June 2020 that truly "asymptomatic transmission" is in fact "very rare", as data from numerous countries showed. Some of the few confirmed cases were due to direct body contact, i.e. shaking hands or kissing [13].
16. No sense to test majority for sars-cov2 and be focused on testing. Cases mean nothing because if you start to test population for IQ you got tremendous amount of idiots. If you start to test a majority for any virus like Herpes you may get "terrible" Herpes "pandemic" like covid19 today. The things even worse because PCR testing related with errors. Moreover PCR reaction cannot be used for medical testing of viruses [34]. Do not allow fool yourself, focusing on covid19 cases is just way to spread fears and making more people scared. Today the PCR testing is killing weapon in unfair hands of corrupted politicians. The policies of lockdowns, face coverings, vaccination and testing are terroristic attack to American people and freedom. "Lockdowns are killing countries all over the world" [Donald J. Trump], [Dr. Reiner Fuellmich], [2]. The cost of one test in Germany is 59 euro. They do about 1.500.000 and make about 90 millions euro weekly. The greatest scam ever and money out of thin air.
17. We have to stop social distancing and mask and bring live to normal said Dr. Dolores Cahill, Professor of Immunology and molecular biology of Ireland. About 2000 patients were deliberately killed by hospitals in Sweden by giving them

Morphine to depress a breathing function. It happens internationally. We have to stop pay taxes because we are helping murders. If we pay taxes we are accountable for this murders- Dr. Mikael Nordfors, Sweden. The cases are based on PCR tests . Roughly is 90% so called test is false positive. So we do not have sick people. About 86% of positive cases have no symptoms. So these are normal healthy people - Dr. Zax Cox, Great Britain. We have 975.000 nurses who do not want the vaccines that were being prepared for us. If we do not have pandemic I want to ask if we have no pandemic why our kids in schools in masks? Find a lawyer in your own country because our rights cannot be infringed by any medical reason. The panic is created by false positive PCR tests. Do not test for covid19. All clinics have to stop PCR tests. Our mainstream media started to press that PCR tests are not correct tests. I am glad about that - Dr. Elke De Klerk, Netherland. There is no pandemic whatsoever. Neither on the world, neither global, neither in Germany. It is just a hoax to suppress people and liberty – Dr. Heinrich Fiechtner, Oncologist, Hematologist, Physician [39], [20].

18. According FDA the different types of tests are approved in USA but only one type is available in Hospitals for testing. No sense of deep invasion to nasal swab. It is the sensitive area can be damaged easily and silently that may cause to severe chronic nasal conditions far later. At the same time a medical staff keeps insert, brand and manufacturer of test kits in secret. At this point it is easy to suggest that conflict of interests with test manufacturers is possible.
19. The chance to catch covid19 from symptomatic carrier is extremely low. Some study show if you permanently live with family member who has symptoms like fever your chances to be sick no more than 15%. To be sick and to break our immunity system barrier the concentration of virus aerosol parcels should be extremely high. It is impossible if even somebody with symptoms coughed or sneezed to us many times in elevator. A teacher may get sick in classroom if almost all students have to be with symptoms and all day cough and sneeze without a rest. It is no realistic scenario. The British epidemiologist Professor Mark Woolhouse stated that there is not a single confirmed case of infection of a teacher by a pupil worldwide.
20. Regardless of the comparatively low lethality of Covid19 in the general worldwide population, there is still no scientific evidence for the effectiveness of masks in healthy people in everyday life. The widespread use of masks didn't prevent the outbreaks in the Chinese city of Wuhan and in Japan in 2019 either. Moreover Face masks should be used only by individuals who have symptoms of respiratory infection such as coughing, sneezing, or, in some cases, fever. Face masks should not be worn by healthy individuals to protect themselves from acquiring respiratory infection because there is no evidence to suggest that face masks worn by healthy individuals are effective in preventing people from becoming ill [14].
21. In fact, several studies have now shown that up to 60% of all people already have a certain cellular immunity to Covid-19, which was acquired through contact with previous coronaviruses (common cold viruses). Children in particular often come into contact with such coronaviruses, which could help explain their insensitivity to Covid19. Many media reports of young and healthy people dying from Covid-19 turned out to be false: many of these young people either did not die from Covid-19, they had already been seriously ill (leukemia, cancer) or they were in fact 109 instead of 9 years old. The claimed increase in Kawasaki disease in children also turned out to be exaggerated. Tracing Pioneer Iceland found "not a single case where a child under 10 infected their parents. A German study came to the conclusion that children act epidemiologically "like brake blocks" and slow down the spread of the new corona virus.
22. The well-known Hamburg medical examiner Professor Klaus Püschel presented his study on the first 12 of 190 detailed corona autopsies at a press conference. Professor Püschel again emphasized that Covid-19 "is not nearly as threatening as was initially suspected". The danger was "too much influenced by media images". The media had focused on severe individual cases and fueled panic with "completely wrong messages". Covid-19 is not a "killer virus" and the call for new medicine or vaccines is "driven by fear, not facts."
23. We have hundreds viruses that live asymptotically inside a body. Many of them are potentially dangerous for others but others basically our friends [22]. Testing and wearing masks against most of them would not have any sense and would be total insanity. The Covid-19 is less dangerous many of them at this point.
24. The median age of the deceased in most countries (including Italy) is over 80 years (e.g. 86 years in Sweden) and only about 4% of the deceased had no serious preconditions. The age and risk profile of deaths thus essentially corresponds to normal mortality. Up to 30% of all additional deaths may have been caused not by Covid-19, but by the effects of the lockdown, panic and fear. For example, the treatment of heart attacks and strokes decreased by up to 60% because many patients no longer dared to go to hospital. A growing share of the excess deaths is not from COVID diagnosed patients but from heart conditions, drug overdoses, suicides. We could call these lockdown deaths. At this point the real COVID statistic among the adults is less that supposed officially. Stanford professor John Ioannidis explains in an interview with CNN that Covid19 is a mild disease comparable to influenza (flu) for the general population. The British chief medical officer Dr. Chris Whitty explained in a lecture that Covid19 posed "no danger to the vast majority of the population". Most people do not or only mildly fall ill with it, and even with those who are seriously ill, the chances of recovery are good.

25. The risk to the general population was greatly exaggerated, official policies were hardly questioned, the situation in hospitals was dramatized, manipulative images were used, campaigns were staged, and protesters were systematically defamed as “idiots”. Many people, including almost all children, can neutralize the new corona virus with an existing immunity (due to contact with previous corona cold viruses) or through antibodies on the mucous membranes (IgA), without it causing much damage. Unlike SARS corona viruses, influenza viruses are transmitted also by children. Indeed, Japan had to close around ten thousand schools in 2019 due to acute outbreaks of the flu. Moreover, up to 60% of children and about 6% of adults may already have cross-reactive antibodies [31].
26. As of 19 March 2020, COVID-19 is no longer considered to be high consequence infectious diseases (HCID) in the UK. In the UK, a high consequence infectious disease (HCID) is defined according to the following criteria: acute infectious disease, typically has a high case-fatality rate, may not have effective prophylaxis or treatment, often difficult to recognize and detect rapidly, ability to spread in the community and within healthcare settings, requires an enhanced individual, population and system response to ensure it is managed effectively, efficiently and safely.
27. The Corona Extra-Parliamentary Inquiry Committee was made in Germany. The Corona Extra-Parliamentary Inquiry Committee will investigate why these restrictive measures were imposed upon us in our country as part of CoVid-19, why people are suffering now and whether there is proportionality of the measures to this disease caused by the SARS-CoV-2 virus. The lead experts and microbiologists of Germany have serious doubts that these measures are proportionate.
28. The scientific grounds of harm of masks so obvious that probably the real purpose of masking is making additional deliberate harm to healthy children population. Not healthy – not smart. It is simple formula. As we know the epidemic of poor health in American children started after 1986, coterminous with the passage of the National Childhood Vaccine Injury Act which resulted in an explosion of the vaccine schedule and revoking right to sue vaccine manufacturers by parents. For American kids born in 1986, only 12.8% had chronic diseases. That number has grown to 54% nowadays [32], [33]. It seems to be that total masking in schools is going to make children’s immunity worst and suppressed even more. Of course It will not occur immediately. The postponed harm that all destructive forces need to avoid gathering proofs and legal cases after years.
29. Additionally to medical reasons of unbelievable harm of wearing masks for hours the mask as foreign element on child’s face will disturb him and prevent good education process. Joy, anger, fear, surprise, sadness, contempt, disgust. These basic building blocks of emotional experience are written all over our faces. Legendary psychologist Paul Ekman has devoted his life’s work to studying non-verbal emotional expression across cultures. His research suggests that we can largely recognize how people around the world are feeling by simply reading their faces. All of humanity expresses these seven core feelings in ways that we universally comprehend. We depend on facial expression to know and understand each other. By putting on masks, we take away information that makes it especially difficult for children to recognize others and read emotional signals, which is unsettling and disconcerting. These issues may be especially true for children with autism spectrum disorder, including Asperger’s syndrome, who tend to have particular difficulties reading non-verbal cues.
30. Absolutely, categorically should not wear a face mask. They make you suggestible; they make you more likely to follow someone else’s direction and do things you wouldn’t otherwise do. In short, they switch off your executive function - your conscience. The fact that masks likely don’t even work brings us to the final reason that wearing one inculcates stupidity and compliance: through a bombardment of lies, contradictions, and confusion, the state overwhelms your ability to reason clearly. From a neuroimaging perspective, masks are known to inhibit identity and impulse control – both associated with executive function in the prefrontal cortex (e.g., Glannon, 2005; Tacikowski, Berger & Ehrsson, 2017). In other words, masks silence the Jiminy Cricket in the brain.
31. It is little wonder that covering our mouths would ‘shut us up’ psychologically. Studies have shown that clothing has a powerful effect on how we think (or not), via a principal known as enclothed cognition: wearing a lab coat enhances cognitive function (Adam & Galinsky, 2012), wearing a nurse’s scrubs increases empathy (López-Pérez et al., 2016), and wearing counterfeit brands increases the likelihood of cheating in a test (Gino, Norton & Ariely, 2010). Similarly, in the world of body language, someone putting their hand over their mouth is a sign that they are listening intently: they are ready to receive information, not to question it.
32. While no studies have looked at the effect of masks on verbal reasoning, it is fairly safe to assume that priming a ‘shutting up’ would have a cognitive effect. For example, extraverts are less compliant than introverts (Cohen et al., 2004; Gudjonsson et al., 2004); the development of conscience in humans is heavily linked to that of language (e.g., Arbib, 2006); and inner speech is highly related to cognitive functions (Alderson-Day & Fernyhough, 2015). Crucially, verbal reasoning is strongly correlated with moral reasoning (e.g., Hayes, Gifford & Hayes, 1998): being unable to ‘speak’ makes one less able to deduce what is moral and immoral behavior.

33. The Department Of Justice filed complaint against Google [45] to restore competition in search and search advertising markets on October 20. The good news because the Google conceal a lot of scientific, politic and other information in search results and play to different lobbyists. People simply cannot get another opinion. If you text for example "mask" in a search bar you will never get information described in this review. Instead you get hundred pages with something like "how and where to buy mask", "how to stay safe in mask during pandemic", "what is bandanas" etc. You get the same information from different sources and get zero resources ask people to think outside the box, critically and scientifically. It makes especially young people more stupid and restricts their brain ability to process controversial things at the same time and make decision based on multiple factors. It means the Google interested in to restrict ability to think more rationally and systematically about abstract concepts and hypothetical events by making people believe to the only "truth" you should never argue. It shapes blind obedience rather than creativity and respect to law and freedom.
34. It is absolutely illegal to require somebody to wear mask without medical license because wear or not to wear mask is a medical question. Moreover according constitution of US we all have medical freedom and nobody can force you to make any medical actions. It is our base right to have medical freedom. Despite of unlawful governor's orders feel free to go anywhere without mask and anybody who force you has to be sued and fined immediately. Use this document as scientific evidences in your court case.
35. More science and doctor opinions about schools reopening and back to the normal without masks and distancing [44].
36. Wearing facemasks causing hypoxic and hypercapnic state that constantly challenges the normal homeostasis, and important survival mechanisms in the human body. These include activation of the limbic part of the brain, release stress hormones (adrenalin, neuro-adrenalin and cortisol), changes in blood flow distribution (vasodilation of peripheral blood vessels and vasoconstriction of visceral blood vessels) and activation of the immune system response (secretion of macrophages and natural killer cells) [46]
37. 'The mask is a part of a larger apparatus of a movement of unelected, wealthy bureaucrats, who are robbing our freedoms and perpetuating lies.' The evidence clearly shows that mask wearing is likely to do no good but a great deal of harm. The big lie, which the WHO, governments everywhere and YouTube want to disseminate, is that wearing masks is essential to control covid-19. But the medical and scientific evidence (banned by YouTube and most mass media) shows that masks have little or no useful effect but can increase the risk of infection and can make breathing difficult [47].
38. As kids are not spreaders on Covid-19 there is question why officials push this vaccine for kids. Vaccines in general have been found to cause a host of chronic, late developing adverse events. Some adverse events like type 1 diabetes may not occur until 3-4 years after a vaccine is administered. In the example of type 1 diabetes the frequency of cases of adverse events may surpass the frequency of cases of severe infectious disease the vaccine was designed to prevent. Given that type 1 diabetes is only one of many immune mediated diseases potentially caused by vaccines, chronic late occurring adverse events are a serious public health issue [48].

Permanent wearing masks are extremely harmful for adults and especially for children any age. Because of ignoring science by many hi-ranked officials there is another question what if it is not only mistake and American kids and adults are under any experiment? At this point in presented review described possible negative psychological consequences for children from daylong wearing masks because it may make affect to their personality, ability to think out of box in the future. The only common thing between permanent mask wearing, useless PCR testing and potentially harmful vaccines is forced medical intervention. People should be strongly against any medical intervention to perfectly healthy body. Sick people should be healed, not healthy. This lesson already was given to us by the Nazi Germany and tribunal on German's pharmaceutical companies and officials who covered them, right after 2nd world war. Moreover the freedom as the highest worth was declared by founders of USA [19] but now hostiles change it and put our safety to the first place in minds. That and others [21] forgeries are perfectly to make ideological subversion and turn on free, developed and beautiful countries like USA to dictatorship. It leads the countries to stopping development and leadership, sinking them to the deep corruption without firing a shot. Wear or not to wear mask or testing with deep invasion of swab to nasal cavity should be considered as a medical intervention similar to getting medication because it has positive and negative sides for human health. As more harm than good for health is a likely outcome it has to be completely voluntary the same as vaccination or any other medical intervention to perfectly healthy body. At this point any PCR testing correlated with a lot of false positive results and cannot be used to define whether person infected or not [34]. Counting cases have zero sense and only symptomatic hospitalizations have to be counted. We have to stop this genocide.
